Portfolio

SUMMARY

Fullstack Engineer with 3+ years of professional experience building and shipping production software (React/TypeScript, Python/Flask, Node.js, REST/GraphQL, SQL), I am now focused on practical GenAI and automation: LLM API integration, RAG, n8n agent workflows and AI-assisted development. Integrated Stripe payments across 12 countries (+22% payment success), built e-wallet and location-based APIs, and contributed to logistics features that improved route efficiency by 34%. I turn vague process problems into working solutions, choose tools pragmatically, and always review and test what AI tools generate. I'm based in Berlin; available for regular on-site days and even relocation.

PROFESSIONAL EXPERIENCE

Fullstack Development Intern 01/2026 – Present
irefill Remote
- Migrated a legacy multi-page PHP website to React and Next.js, restructuring homepage, product, gallery and blog pages into reusable components.
- Connected the new frontend to the existing PHP backend through a JSON API layer, avoiding a full backend rewrite.
- Separated frontend presentation from backend data access, keeping existing functionality while modernising the application structure.
- Implemented server-side rendering with Next.js and Tailwind CSS to improve SEO and first-load performance.
- Used Claude Code to speed up codebase analysis, migration and implementation, and manually reviewed all architectural decisions and generated code.

Trainee Lead 04/2026 – 06/2026
Inditex (Pull & Bear) Berlin, Germany
- Completed a three-month leadership development program focused on commercial operations, analytics, team coordination and store management.
- Analysed an internal onboarding workflow, identified the main bottleneck and proposed an AI-assisted solution to make information easier to find.
- Coordinated a store team and used real-time performance data to prioritise daily operations.

Frontend Engineer 09/2020 – 11/2021
GoBolt Solutions Gurugram, India
- Developed React and TypeScript interfaces for logistics operations, including real-time tracking, shipment data and operational dashboards.
- Built reusable components and integrated REST and GraphQL services with backend developers.
- Contributed to trip-optimisation functionality that improved route efficiency by 34%.
- Improved shipment and invoicing workflows, contributing to a 27% gain in operational efficiency.

React Frontend Engineer 10/2019 – 08/2020
NorthLoop Gurugram, India
- Integrated a secure Stripe payment system supporting cross-border transactions in 12 countries and raised payment success rates by 22%.
- Refactored a legacy frontend into reusable React Hooks and TypeScript components, improving performance, modularity and maintainability.
- Built reusable, scalable components with Hooks and TypeScript, making code easier to maintain across the platform.

- Promoted to Frontend Engineer at GoBolt Solutions for consistently high-quality code and strong problem-solving skills.

Junior Fullstack Developer 08/2018 – 09/2019
Leapture LLC Remote
- Built and integrated REST APIs using Python/Flask for e-commerce, e-wallet and location based services.
- Developed location based functionality using Google Maps APIs and integrated frontend components with backend services.
- Built interactive application interfaces using React and JavaScript.

EDUCATION

MSc IT Management 05/2023 – 05/2025
BSBI Berlin, Germany

MBA International Marketing (2 semesters) 10/2021 – 03/2023
IUBH Berlin, Germany

Bachelor of Technology in Computer Science & Engineering (Division 1st) 08/2014 – 07/2018
Ghaziabad, India

SKILLS

Frontend
React, TypeScript, JavaScript, Next.js, HTML, CSS, Tailwind CSS, Responsive Design, Reusable Components

Backend
Node.js, Express, Python, Flask, SQL, PostgreSQL, REST, GraphQL, JSON APIs, Stripe and Google Maps Integrations

GenAI & Automation
n8n (agents, webhooks, JSON transformation, expressions), LLM API integration (OpenAI, Gemini, Anthropic, OpenRouter), RAG, embeddings and vector search (Supabase), MCP, multi-agent systems, voice agents (ElevenLabs, Twilio)

Tools
Git, GitHub, CI/CD, Testing, Debugging, Agile/Scrum, Performance Optimization

AI-assisted development
Claude Code (Slash Commands, Skills, MCP, Hooks, Plugins, Sub-Agents), Cursor, GitHub Copilot, OpenAI Codex, Context Management

LANGUAGES

English
Native

German
B1 (Learning Actively)

Hindi
Native

PROJECTS & PROFESSIONAL DEVELOPMENT

LLM-Powered RAG Portfolio Assistant 07/2026 – 07/2026
- Designed and deployed a full-stack portfolio application with an AI assistant that answers questions using information grounded in my professional background and projects.
- Built the user interface, API integrations and underlying data flow, taking the product from initial concept through deployment and iteration.
- Implemented retrieval and LLM functionality while considering response reliability, error handling and user experience.
- Used AI-assisted development tools, including Claude Code, to accelerate implementation while reviewing and refining the resulting architecture and code.
- Deployed the application for public use using Vercel
