Summary

An IT professional with 3+ years of hands on experience looking to restart after a study break. I have experience working on Frontend Applications like ReactJS and JavaScript, and Backend technologies like SQL and DataVerse. Currently I find myself enjoy working integration of AI tools in the business processes, fine tuning LLMs and RAG systems. I have hands on experience comparing and evaluating LLMs for real business use cases, setting up monitoring and feedback loops to continuously improve model outputs.

Relevant Experience

Trainee Lead in Fashion, *Inditex* 04/2026 – 06/2026
Project: Successfully completed 3 months leadership program focused on training selected individuals to become future managers within the organisation.
- Learned and trained to work on the analytics of the commercial and operations parts of running a retail store.
- Identified a bottleneck in the business onboarding process and bridge the gap by documenting and supporting technical decisions around AI Architecture and workflows
- Used the inbuilt organisation's app to improve and provide real time metrics and solutions for the better performance by using workflow agents and taking the lead to define orchestrating architecture

Sales Assistant, *Uniqlo* 09/2025 – 12/2025
Berlin, Germany
- Trained and learned to be a sales assistant in a retail store.
- Managed replenishment, fitting rooms, delivery orders and stock inventory.

Frontend Engineer, *GoBolt Solutions* 09/2020 – 11/2021
Gurugram, India
Project: Partners Platform - A React Based interactive dashboard to maintain details of partners of the organisation and also keep tabs on routing efficiency.
- Upgraded two SaaS products with React 17, ES13, Redux, and Hooks, making them more user-friendly and easier to maintain.
- Built a trip optimization tool that boosted route efficiency by 34% and reduced logistics costs through smarter data structures.
- Created a scalable front-end for real-time tracking and data visualization, including advanced filtering and sorting features.
- Streamlined shipment and invoicing flows with React.js, GraphQL, and API integrations, increasing operational efficiency by 27%.

Technologies used: ReactJS | TypeScript | HTML | CSS | Scrum | Agile | Gitlab | JavaScript | Styled Components

React Frontend Engineer, *NorthLoop* 10/2019 – 08/2020
Gurugram, India
Project: International Money Transfer App - A react app to make international money transactions easily with less service fees. Developed high-availability React-based fintech interfaces supporting international payments across 12 countries, improving transaction success rates by 22%
- Integrated a secure, scalable Stripe payment system, enabling smooth cross-border transactions in 12 countries and boosting payment success rates by 22%.
- Refactored a legacy React 16 project, improving performance, modularity, and maintainability—cutting time-to-market for new features.

- Built reusable, scalable components with React Hooks and TypeScript, making code easier to maintain across the platform.
- Promoted to Frontend Engineer at GoBolt Solutions for consistent high-quality code and strong problem-solving skills.

Technologies used: ReactJS | Redux | HTML | CSS | Scrum | Agile | Github | JavaScript | Styled Components

Junior Frontend Engineer, *Leapture LLC* 08/2018 – 09/2019
Remote

Project: An E-Commerce web app that provides recommendations for everything from cafes to shopping centres in your radius and also provides the best deals for you

- Developed location-tracking modules with Google Maps API, increasing geolocation accuracy and enabling fast region segmentation.
- Built and integrated robust APIs using Python Flask and React.js for shopping, e-wallet, and location services.
- Created interactive UI components with React 16, ES13, and HTML5/CSS3 to boost user engagement and functionality.

Technologies used: ReactJS | Redux | HTML | CSS | Scrum | Agile | Github | JavaScript | Python | Flask

PROJECTS AND CERTIFICATIONS

Udemy : AI Builder: Create Agents, Voice Agents & Automations in n8n
currently pursuing

Udemy : AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents
currently pursuing

TECH SKILLS

Programming
JavaScript (3) HTML/CSS (3) Tailwind (1) TypeScript (2)

Project management
Agile (3) Scrum (3)

Frameworks / Tools
