Summary

Full-Stack Developer with 3+ years of professional experience building customer-facing web applications with React, TypeScript and JavaScript. Experienced in integrating REST and GraphQL APIs and working with Node.js, Express, PostgreSQL and Python across product and personal projects. Recently built AI-enabled applications using LLM APIs, RAG and agentic workflows, with Claude Code integrated into my development process. Strong English communicator who works independently while collaborating effectively across product, backend and operational teams.

Professional Experience

irefill, *Frontend Development Intern*
01/2026 – Present
Remote

- Migrated a legacy PHP multi-page website to a component-based React and Next.js architecture, creating reusable, responsive components for product, gallery, blog and homepage experiences.
- Integrated the existing PHP backend through a JSON API layer, allowing the React frontend to consume product and content data without requiring a full backend rewrite.
- Implemented server-side rendering with Next.js to improve SEO and initial page performance, with Tailwind CSS used for responsive interface development.
- Used Claude Code to accelerate codebase analysis, component migration, debugging and implementation while manually reviewing architectural decisions and generated code.
- Conducted a technical audit of the legacy application, identified a live spam-link injection vulnerability and documented remediation steps.

Inditex (Pull & Bear), *Trainee Lead*
04/2026 – 06/2026
Berlin, Germany

- Completed a three-month leadership development program focused on commercial operations, analytics, team coordination and store management.
- Analysed an internal onboarding workflow, identified the main bottleneck and proposed an AI-assisted solution to make information easier to find.
- Coordinated a store team and used real-time performance data to prioritise daily operations.
- Completed a three-month leadership programme covering commercial operations and analytics.

GoBolt Solutions, *Frontend Engineer*
09/2020 – 11/2021
Gurugram, India

- Developed scalable React and TypeScript interfaces for logistics operations, including real-time tracking, shipment data and operational dashboards.
- Built reusable components and integrated REST and GraphQL services in collaboration with backend developers.
- Contributed to trip-optimisation functionality that improved route efficiency by 34%.
- Improved API-driven shipment and invoicing workflows, contributing to a 27% increase in operational efficiency.
- Participated in technical decisions concerning component structure, state management and frontend API integration.

NorthLoop, *React Frontend Engineer*
10/2019 – 08/2020
Gurugram, India

- Integrated a secure, scalable Stripe payment system, enabling smooth cross-border transactions in 12 countries and boosting payment success rates by 22%.

- Refactored a legacy frontend project, improving performance, modularity, and maintainability.
- Built reusable, scalable components with Hooks and TypeScript, making code easier to maintain across the platform.
- Promoted to Frontend Engineer at GoBolt Solutions for consistently high-quality code and strong problem-solving skills.

Leapture LLC, *Junior Fullstack Developer* 08/2018 – 09/2019
Remote

- Built and integrated REST APIs using Python/Flask for e-commerce, e-wallet and location based services.
- Developed location based functionality using Google Maps APIs and integrated frontend components with backend services.
- Built interactive application interfaces using React and JavaScript.

Skills

Frontend
React, TypeScript, JavaScript, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Redux, responsive UI

Backend
Node.js, Express.js, Python, Flask, PostgreSQL, SQL, REST APIs, GraphQL, JSON APIsstgreSQL, SQL

APIs and Architecture
REST APIs, GraphQL, third-party integrations, component architecture, client-server applications

AI Assisted Development
Claude Code, OpenAI API, LLM integration, RAG, AI agents, workflow automation

Engineering
Git, GitHub, CI/CD, testing, debugging, Agile/Scrum, performance optimisation

Projects & Professional Development

LLM-Powered RAG Portfolio Assistant 07/2026 – 07/2026

- Designed and deployed a full-stack portfolio application with an AI assistant that answers questions using information grounded in my professional background and projects.
- Built the user interface, API integrations and underlying data flow, taking the product from initial concept through deployment and iteration.
- Implemented retrieval and LLM functionality while considering response reliability, error handling and user experience.
- Used AI-assisted development tools, including Claude Code, to accelerate implementation while reviewing and refining the resulting architecture and code.
- Deployed the application for public use using Vercel

Education

MSc IT Management, *BSBI* 05/2023 – 05/2025
Berlin, Germany

MBA International Marketing (2 semesters), *IUBH* 10/2021 – 03/2023
Berlin, Germany

Bachelor of Technology in Computer Science & Engineering (Division 1st) 08/2014 – 07/2018
Ghaziabad, India
